THE CELLBERUS™ SOLUTIONS

BASECAMP EDITION

BASE

- WiFi 6 Access Point
 - 2x2 MIMO
 - Supports up to 256 clients
 - 2.4GHz/5GHz
 - Waterproof IP67-rated
- 16-Port Rugged Ethernet Switch

NOTE: Requires Cellberus™ MAX router or upgrade to BASE MAX unit with integrated router.

- 15/20A 120V power inlet
- 20A 120V GFCI power outlet
- Four (4) LED fixtures
 - 140,000 lumens

BASE MAX

Includes everything in BASE, plus:

- Bonded dual modem cellular router
- Optional long-range dome antenna
- IoT/LTE/4G/5G

EXT

- Adds additional coverage to BASE
- Up to two (2) per power source
- WiFi mesh support

CELLBERUS™ BASE, BASE MAX, and EXT

are unique portable communication and lighting solutions for a wide variety of basecamps, locations and environments, both indoors and out.

The BASE lineup provides the same powerful illumination as a full-size LED light tower, but its compact design allows for the ultimate in versatility and ease of use. Use one all by itself, or choose to link multiple towers together. The linking capability allows for not just flexibility and versatility, but also greater network and illumination coverage. BASE units are powered by a standard 15-20A 120V outlet and can be run off a small 2000W generator. BASE networks are powerful, bonded cellular communication platforms which can replace the need for individual hotspots and improve overall performance across all users.

WE BRING
IDEAS TO
THE SKIES

WHO WE ARE

Cellberus™ Communications is an enterprise cellular and edge network provider, specialized in deploying complex temporary networks for remote environments.

SITE SURVEY & DESIGN

No two locations are the same. Our knowledgeable engineers will survey the RF environment on your jobsite, document physical and geographical challenges, pull tower charts, and review carrier data to provide an actionable plan for your location(s).

REMOTE NETWORKS ON THE EDGE

We provide connectivity, anytime, anywhere. Our solutions include, but not limited to: bonded cellular networks, ruggedized network infrastructure, network-based cellular repeater systems, and so much more. From hotspots to advanced large-scale deployments at basecamp or in the field, we have you covered.

TECHNOLOGY INNOVATION

Our company lives on the cutting edge. We implement state-of-the-art technology as a core foundation of our solutions, providing incredible value to our customers. We're proud to be a development partner with companies like Peplink, DellEMC, Juniper Networks, SpaceX, and Cel-Fi by Nextvity to rethink what's possible.
